PROFESSIONAL SUMMARY

Software Engineering student (5th semester at FIAP) with a strong foundation in systems development, data analysis, and certification in **Artificial and Computational Intelligence**. Hands-on experience in **Python, SQL, building data pipelines, and Business Intelligence** at Datamar. Combining structured logical reasoning and a passion for problem-solving.

EDUCATION

FIAP - Faculdade de Informática e Administração Paulista
Aug 2023 – Jun 2027

Bachelor of Software Engineering (5th Semester)

- **Academic focus:** Artificial Intelligence, Statistical Modeling, Software Architecture, Algorithms and Data Structures.
- **Global Solution Project:** Development of a distributed web solution for cataloging and analyzing spatial data ("The New Space Economy").

Pan American Christian Academy
Completed in Jun 2023

High School Diploma (Education in English)

PROFESSIONAL EXPERIENCE

Datamar
Feb 2026 – Present

Systems Analyst

- Working across the full lifecycle of corporate systems development and maintenance and backend data architecture.
- Development and integration of solutions in **Python** and the software ecosystem to optimize operational workflows.
- Continuous use of **Git/GitHub** for version control and collaborative coding practices.

Datamar
Mar 2025 – Feb 2026 (1 yr)

Junior Data Analyst

- Analysis, structuring, and transformation of databases using **Python and SQL** to extract strategic maritime intelligence insights.
- Development of Business Intelligence (BI) dashboards and automated reports, improving analytical decision-making.
- Application of statistical logic and raw data processing for data cleaning and validation of indicators (KPIs).

Chapel School
Sep 2023 – Mar 2025 (1 yr 7 mos)

Educational Assistant (Elementary Assistant)

- Worked in a multicultural and 100% bilingual environment, practicing fluent daily English communication, leadership, and conflict resolution.

CERTIFICATIONS & EXTENSION COURSES

- **Artificial and Computational Intelligence (Inteligência Artificial e Computacional)** – FIAP (Jan 2026) | Credential: 7f6c533c0511e134...
- **C# Language & Object-Oriented Development** – Alura (Jul 2025)

TECHNICAL SKILLS & LANGUAGES

Languages & AI:	**Python, Machine Learning** (Supervised/Unsupervised), **LLM & Generative AI Concepts**, C#, Java, JavaScript, HTML/CSS.
Data & Databases:	**SQL**, Statistical Modeling, Data Analysis (Pandas/NumPy), Business Intelligence (Power BI/Dashboards).
Tools & Cloud:	**Git / GitHub**, Cloud Fundamentals (AWS/GCP), Advanced Microsoft Office/Excel, Visual Studio Code.
Languages:	**English (Fluent / Native-level)** – American High School Education; **Portuguese (Native)**; French (Basic).
